

Call our office at 303.741.5276 for additional information on our programs and how you may benefit.

TRAINING MENU

We offer choices to meet your training needs. Anywhere from standard courses with scripts, text and handouts to customized curriculums to meet the specific needs for your organization. Review all of your choices and then call our offices for details on which may be best for you.

DISTANCE LEARNING

Now through the power of the Internet your staff can attend training without leaving their workstation. Through a high speed web connection (DSL or T1) we can now bring training to your desktop. This is ideal for

- Small groups of 1 to 4 not needing a high degree of interactivity with the curriculum
- Limited time, schedule flexibility, and budget. There are no travel expenses or equipment setups. We can work with your schedule and spread a course over multiple hours on multiple days if you prefer.

COME TO OUR LEARNING CENTER

We offer state of art training at our DTC location in South Metro Denver. Each student has a laptop fully loaded with the appropriate course. This is an ideal offsite environment where you can focus on the training without disruption from the office.

We will provide all equipment, unrestricted access to our trainers and an advance electronic copy of the training text.

ATTEND ONE OF OUR STANDARD COURSES

We routinely offer classroom training on the most popular applications and technologies (I.e. Crystal, FRx, Accts Payable, General Ledger, etc.) at our DTC office. You will attend these trainings with other users in the area and be able to share and learn from their experiences as well as our training.

LET US BRING IT TO YOUR SITE

We have developed a fully portable training center where all we need at your site is a meeting room and students. We come self contained with training machines, projector and curriculum. No more setup of temporary workstations, software uploads, network stringing etc for your IT staff. Now we come with fully loaded laptops with all current applications for your training. This option is ideal for several of your staff who you cannot afford to lose to offsite training due to your mission or proximity.

ONE-ON-ONE TRAINING

Our consultants will come to your site and spend specific time with your staff in showing new techniques as well as addressing issues or additional support for your problem areas.
